EXPERIENCE

Software Developer

Apr 2026 – Aug 2026

IE Network Solutions | Addis Ababa

- Developed CRM and Service Desk backend modules using NestJS and PostgreSQL.
- Designed REST APIs, service layers, validation pipelines, and reusable backend architecture.
- Built ticket management, SLA tracking, escalation workflows, and CRM automation features.
- Designed optimized relational database schemas for operational reporting and analytics.
- Integrated CRM and Service Desk modules through workflow automation.
- Standardized frontend-backend API contracts, improving development efficiency across teams.
- Collaborated with cross-functional teams to deliver production-ready enterprise software.

AI & Data Engineer

Jul 2025 – Apr 2026

Freelance

- Built enterprise AI assistants using Azure OpenAI to automate business processes and improve operational efficiency.
- Designed and implemented Retrieval-Augmented Generation (RAG) systems with embedding pipelines, document chunking, and prompt engineering.
- Developed scalable backend services and REST APIs using FastAPI.
- Integrated AI services with multiple internal and external REST APIs.
- Deployed and maintained production AI applications on Microsoft Azure.
- Built intelligent request-routing systems for AI, API, and hybrid workflows.
- Improved AI system performance by optimizing retrieval quality, latency, and response reliability.

Full Stack Developer

2024 – 2025

Freelance

- Designed and developed end-to-end web applications using React, Next.js, TypeScript, Express.js, and NestJS.
- Built scalable backend services, REST APIs, and secure authentication systems.
- Designed PostgreSQL databases and optimized data models for business applications.
- Developed AI-powered features including document processing and workflow automation.
- Integrated third-party APIs for authentication and external business services.
- Deployed applications to Microsoft Azure using modern cloud deployment practices.
- Applied clean architecture and modular design principles to build maintainable production systems.

CERTIFICATION

DP 100 - Azure Data Science

Microsoft

Data Scientist

Datacamp

AI 102 Design AI solution

- Microsoft

SUMMARY

- AI Software Engineer with hands-on experience designing, building, and deploying production-grade backend systems and AI-powered applications. Experienced in FastAPI, NestJS, React, TypeScript, Python, Azure, and Large Language Models (LLMs). Specialized in Retrieval-Augmented Generation (RAG), Azure OpenAI, REST APIs, workflow automation, and cloud deployment. Passionate about building scalable software that solves real business problems through reliable engineering and practical AI solutions.

KEY PROJECTS

Enterprise CRM & Service Desk

IE Network Solutions

- Developed CRM and Service Desk backend modules using NestJS and PostgreSQL.
- Implemented ticket management, SLA tracking, workflow automation, and reporting features.
- Designed scalable REST APIs and optimized relational database schemas.

AI Enterprise Assistant (Copilot System)

IE Networks Solution

- Built LLM-powered assistant for automation and decision support.
- Integrated multiple APIs with intelligent routing.
- Enabled task automation and business insights generation.

Food Recipe AI Platform

Freelance

- Developed a full-stack AI-powered recipe recommendation platform.
- Built frontend using React/Next.js and backend with Node.js.
- Integrated AI recommendations based on available ingredients and user preferences.

EDUCATION

BSc in Computer Science

2021 - 2024

University of Gondar

- Graduated with Honors.

SKILLS

- Python, TypeScript, JavaScript, FastAPI, NestJS, React, Next.js, Azure, Azure OpenAI, RAG, LangChain, REST APIs, PostgreSQL, Docker, Git, Linux
